

SES Provider Websites

Last Updated Wednesday, 27 January 2010

In addition to the oaSES system, we also design and host unique and professional websites for SES providers. We offer three levels of site, (Basic, Standard and Premium) each of which are customized to your individual requirements.

For all levels we will customize the site to include your business logo, color and font schemes. In addition, you will be able to modify and update the website yourself using a simple administration program. Don't worry though, if you're too busy or uncomfortable with updating your own website, we can provide an ongoing service to do it for you.

Each package includes a monthly charge which covers hosting, email maintenance, security updates and website statistics.

Basic SES Website \$995 + \$30/m

The Basic package provides up to six pages typically including a Home page, About Us, Services Provided, Contact Us pages. Up to ten email addresses are included with this package. This is a great option for those just needing a small basic website.

Standard SES Website \$1995 + \$40/m

The Standard package includes up to ten pages and also extra features providing the ability for you to have a downloadable application form for tutors and also a database of links to recommended resources (e.g. FL DOE information, instructional websites etc.). Up to fifty email addresses are included.

Premium SES Website \$2995 + \$50/m

The Premium package include all the features of the Standard package and in addition provides up to twenty pages for the site. It also includes a secure area of the site that is only accessible by registered users. This is particularly useful for storing private company document like handbooks, forms, policies and other non-public items. In addition an online application form can be included to replace or supplement your existing forms. Up to one hundred email addresses are included.
