

oaSES 2008-2009 - development is well underway.

Last Updated Sunday, 02 March 2008

The current oaSES product has been a great success during the 2007-2008 academic year and we've been working on the updated 2008-2009 product for some time. Look for great new features, faster operation and more flexibility to match your tutoring setup.

We are great believers in customer feedback and the new 2008-2009 oaSES product has the greatest number ever of client requested enhancements and updates. In addition, we also meet and talk with as many prospective clients as we can to get their unique ideas and thoughts on how they would run their future SES businesses. Finally, we regularly liaise with School District coordinators along with State and Federal contacts to be ahead of the game when it comes to legislative and operational changes affecting the oaSES system.

We will be publishing a full list of changes in the next few weeks however a quick snapshot of some of the new features in oaSES 2008-2009 is:

- Easier handling of multi-State, multi-School District operations.
- New session templates function.
- More flexible multiple access levels including administrator level, school district level, lead teacher level and tutor level.
- Improved features to transfer data to School Districts.
- Many new reports.
- Updated terminology and labels to fit with industry accepted standards.
- Significant speed improvements.
- Redesigned user interface with better data presentation.
