

The oaSES Data Setup Service

Last Updated Sunday, 25 October 2009

We understand that there can be an incredible amount of data and information circulating around within your SES operation so to get that all under control and into oaSES we now offer our "Data Setup Service". For new clients, we will take your tutor and student data and load it into your oaSES system. This enables you to make a fast and easy start with oaSES but also gives you that complete set of data in the system so you can get accurate historical reports and business information.

When combined with our EasyLink options, the Data Setup Service creates a seamless transition in moving to oaSES from spreadsheet or other systems.

Call us today on 866-327-0035 for more details.
